INDEPENDENT AUDITORS' REVIEW REPORT
MARCH 31, 2023 AND 2022**

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of Formosa Taffeta Co., Ltd.

Introduction

We have reviewed the accompanying consolidated balance sheets of Formosa Taffeta Co., Ltd. and subsidiaries (the "Group") as at March 31, 2023 and 2022, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the three months then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

We conducted our reviews in accordance with the Standard on Review Engagements 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity" of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As explained in Notes 4(3) and 6(7), the financial statements of certain insignificant consolidated subsidiaries and investments accounted for using the equity method were not reviewed by independent auditors. Those statements reflect total assets (including investments accounted for using the equity method) of NT\$16,815,345 thousand and NT\$17,974,890 thousand, both constituting 22% of the consolidated total assets, and total liabilities of NT\$3,698,573 thousand and NT\$5,231,683 thousand, constituting 18% and 27% of the consolidated total liabilities as at March 31, 2023 and 2022, respectively, and total comprehensive income (including share of profit and other comprehensive income of associates

accounted for using the equity method) amounting to (NT\$26,716) thousand and NT\$124,688 thousand, constituting (1%) and 35% of the total comprehensive income for the three months then ended, respectively.

Qualified Conclusion

Except for the adjustments to the consolidated financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries been reviewed by independent auditors, that we might have become aware of had it not been for the situation described above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at March 31, 2023 and 2022, and of its consolidated financial performance and its consolidated cash flows for the three months then ended in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and International Accounting Standard 34, “Interim Financial Reporting” that came into effect as endorsed by the Financial Supervisory Commission.

(4) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expenses in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expenses when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognized past service costs. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of government bonds (at the balance sheet date) instead.
- ii. Remeasurements arising on defined benefit plan are recognized in other comprehensive income in the period in which they arise and recorded as retained earnings.
- iii. Past service costs are recognized immediately in profit or loss.
- iv. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. And, the related information is disclosed accordingly.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(5) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognized directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. A deferred tax asset shall be recognised for the carry forward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

G. The interim period income tax expense is recognized based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

Price risk

- i The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.
- ii. The Group's investments in equity securities comprise shares, open-end funds and beneficiary certificates issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, post-tax profit for the three months ended March 31, 2023 and 2022 would have increased/decreased by \$0 and \$0, respectively, as a result of gains/losses on equity securities classified as at fair value through profit or loss. Other components of equity would have increased/decreased by \$353,237 and \$414,943, respectively, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Group's main interest rate risk arises from long-term borrowings with variable rates, which expose the Group to cash flow interest rate risk. During the three months ended March 31, 2023 and 2022, the Group's borrowings at variable rate were denominated in the NTD and USD.
- ii. The Group's borrowings are measured at amortized cost. The borrowings are periodically contractually repriced and to that extent are also exposed to the risk of future changes in market interest rates.
- iii. If the borrowing interest rate of NTD dollars had increased/decreased by 1% with all other variables held constant, profit, net of tax for the three months ended March 31, 2023 and 2022 would have decreased/increased by \$76,800 and \$77,600, respectively. The main factor is that changes in interest expense result from floating rate borrowings.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms.
- ii. The Group manages its credit risk taking into consideration the entire group's concern. For banks and financial institutions, only independently rated parties with good rating are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control

assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored.

- iii. The Group adopts the following assumption under IFRS 9 to assess whether there has been a significant increase in credit risk on that instrument since initial recognition:
If the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.
- iv. The Group adopts the assumption under IFRS 9, that is, the default occurs when the contract payments are past due over 90 days.
- v. The Group classifies customer's accounts receivable and contract assets in accordance with product types and customer types. The Group applies the simplified approach using the provision matrix to estimate expected credit loss.
- vi. The Group wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Group will continue executing the recourse procedures to secure their rights.
- vii. The Group uses the forecastability of National Development Council Business Cycle Indicator to adjust historical and timely information to assess the default possibility of notes receivable, accounts receivable and contract assets. As of March 31, 2023, December 31, 2022 and March 31, 2022, the provision matrix is as follows:

| | Not past due | Up to 30 days past due | 31~90 days past due | Over 90 days past due | Total |
|--------------------------|--------------|---------------------------|------------------------|-----------------------------|--------------|

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance and compliance with internal balance sheet ratio targets.

- ii. Surplus cash held by the operating entities over and above balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits, commercial paper and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the abovementioned forecasts. As at March 31, 2023, December 31, 2022 and March 31, 2022, the Group held money market position of \$40,469,747, \$38,634,214 and \$44,753,881, respectively, that are expected to readily generate cash inflows for managing liquidity risk.
- iii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities.

| | <u>Less than 1 year</u> | <u>Between 1 and 2 years</u> | <u>Between 2 and 5 years</u> | <u>More than 5 years</u> |
|--|-----------------------------|----------------------------------|----------------------------------|------------------------------|
| Long-term borrowings (including current portion) | | | | |
| March 31, 2023 | \$ 130,352 | \$ 8,373,803 | \$ 1,425,960 | \$ - |
| December 31, 2022 | 470 | 8,340,829 | 1,429,000 | - |
| March 31, 2022 | - | 9,779,188 | - | - |
| Lease liability | | | | |
| March 31, 2023 | \$ 146,391 | \$ 124,921 | \$ 316,399 | \$ 317,275 |
| December 31, 2022 | 141,747 | 123,682 | 303,895 | 325,194 |
| March 31, 2022 | 134,156 | 122,475 | 294,700 | 342,883 |

- (d) The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value estimation

- A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks and beneficiary certificates with quoted market prices is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in some unlisted stocks and most derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity investment without active market is included in Level 3.

B. Financial instruments not measured at fair value

The carrying amounts of cash and cash equivalents, financial assets at amortized cost, notes receivable (including related parties), accounts receivable (including related parties), other receivables, short-term borrowings, short-term bills payable, notes payable (including related parties), accounts payable (including related parties), other payables and long-term borrowings (including current portion) are approximate to their fair values.

C. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities are as follows:

(a) The related information on the nature of the assets and liabilities is as follows:

| Equity securities | \$ 35,984,742 | \$ 466,200 | \$ 5,043,371 | \$ 41,494,313 |

- (b) The methods and assumptions the Group used to measure fair value are as follows:
- i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

| | <u>Listed shares</u> | <u>Open-end fund</u> |
|---------------------|----------------------|----------------------|
| Market quoted price | Closing price | Net asset value |

- ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques such as current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including applying a model using market information available at the consolidated balance sheet date.
- iii. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.
- iv. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

D. For the three months ended March 31, 2023 and 2022, there was no transfer between Level 1 and Level 2.

E. The following chart is the movement of Level 3 for the three months ended March 31, 2023 and 2022:

| | <u>Three months ended March 31, 2023</u> |
|---|--|
| | <u>Non-derivative equity instruments</u> |
| At January 1 | \$ 2,409,658 |
| Recorded as unrealized losses on valuation of investments in equity instruments measured at fair value through other comprehensive income | 115,524 |
| At March 31 | <u>\$ 2,525,182</u> |

| | <u>Three months ended March 31, 2022</u> | |
|---|--|------------------|

| Recorded as unrealized losses on valuation of investments in equity instruments measured at fair value through other comprehensive income | | 162,683 |
| At March 31 | \$ | <u>5,043,371</u> |

- F. The accounting department is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.
- The accounting department sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensures compliance with the related requirements in IFRS. The related valuation results are reported to the supervisor of accounting department monthly. The supervisor is responsible for managing and reviewing valuation processes.
- G. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

| | Fair value at March 31, 2023 | Valuation technique | Significant unobservable input | Relationship of inputs to fair value |
|-----------------------------------|---------------------------------------|-----------------------------|---|---|
| Non-derivative equity instrument: | | | | |
| Unlisted shares | \$ 98,309 | Market comparable companies | Price to earnings ratio multiple, price to book ratio multiple, enterprise value to operating income ratio multiple, enterprise value to EBITA multiple, discount for lack of marketability | The higher the multiple and control premium, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value |

| Unlisted shares | \$ 127,759 | Market comparable companies | Price to earnings ratio multiple, price to book ratio multiple, enterprise value to operating income ratio multiple, enterprise value to EBITA multiple, discount for lack of marketability | The higher the multiple and control premium, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value |
| | 4,915,612 | Net asset value | Not applicable | Not applicable |
