01 Recycled PET stretch functional fabrics

FTC collaborates with upper stream suppliers to develop a new composite eco friendly stretch textiles products with fluffier texture, better handfeel and good elasticity.

Advantages

1. 100% Recycled PET
2. Compare with the similar products: elasticity up 15%, wicking improved 20%, UPF(100+)
3. Can be use for water proof breathable clothing to enable a softer, thicker and warm feel.

Application : sportswear, casual and outdoor wear.

COMOFIT™

02

Recycled nylon 6 mechanical stretch

FTC Comofit is a polyamide 6 mechanical stretch fabric that does not contain spandex covered yarn, but still has excellent elasticity, natural cottony texture and comfort. Moreover, the excellent wicking & quick dry function can provide the wearer with comfort and relaxation during activity.

Advantages

1. Eco friendly is the market main stream
2. Comfort stretch and fluffy texture
3. No undyeable spandex exposure issue
4. Single material design is easier for future garment recycle system

Application: sportswear, urban casual and outdoor wear.

03 Bio based spandex

FTC utilizes bio-based spandex comes from non-edible industrial corn through fermentation technology, transforming it into bio-based material. This bio-based spandex performs just like conventional spandex in terms of its performance. This new generation of stretch product can be combine with different functional finishing for different seasons and purposes.

Eco friendly pursuits

1. Bio based spandex yarn contains 30% of bio components.
2. Reduce 39% of water usage and 23% of carbon emission
3. Replace oil with plants, diminish the reliance on fossil fuels.

04 Recycled PET from textiles waste fabrics

FTC has utilized recycled polyester yarn from textile waste to develop a range of fabric products that can be used in sports, outdoor, casual and fashion wear. These fabric products are not just inspired by eco concept, they have also been given a new life and became a part of the realization of circular economy. Let us make a positive contribution to our environment.

1. Reduce 75% of CO₂ emissions
2. Reduce 85% of energy consumption
3. Reduce our reliance on oil resources and minimized environmental damage caused by oil drilling.

05 Upgraded Omni-Heat Infinity fabrics

FTC's joint project with US outdoor brand. This upgraded version of treatment for reflecting body heat can enhance thermal protection. Furthermore, when combined with advanced bonding baffle technology we can effectively achieve a multi-functional technology that encompasses waterproof breathability, down-proof and warmth retention. This is a versatile product that can offer both functionality and fashion.

03. Operation Orientation

Operation Orientation

1 IS MORE a milestone of textile industry

Developing the electrospinning fabric with high waterproof, breathable, fluoride-free, and mono nylon, which could be recycled to expand the outdoors market.

Circular Economy, Sustainable Environment

Upholding the sustainable environment spirits, promote water-, energy-saving, and carbon reduction projects as well as develop eco-friendly products with the aim to circular economy.

3 Introduction of AI, Smart Manufacturing

Introducing AI and AOI technology to fulfill digitalization and improve the efficacy of product management.

Global Deployment, Expanded Cooperation

Utilizing capacity adjustment among the five factories in Taiwan, China, and Vietnam to assure smooth production and delivery, and deepening the cooperation with branded customers to become long-term partners.
